Validation of HPGe results.

Is there an issue with the samples that your team had collected?

Sorry Pete and Margo, I did have a follow-up question. Are the analyses the NAREL lab for fingerprinting purposes or some other reason? Thanks again and have a good day.

Tom

CAUTION: External email. Beware of links and attachments.

Hi Tom,
My apologies on the delay in replying. I have several high priority issues that needed my attention yesterday.

I have to go back and verify a couple of historical reports for NFB. In addition, we had send some samples to our NAREL laboratory but the processing of these samples have been delayed due to COVID. I'll contact the laboratory tomorrow to find out where we are at with these.

As for Talarico/Grace, I need to verify what was produced by the Site Assessment Team. You should have received all the data for what I had collected.

FYI – The green light has been given to move forward with the removal at Talarico/Grace property. We plan to mobilize on Monday, November 16 and should be completed by the end of the week. Also next week, I plan to collect waste characterization samples at the Robert Street properties.

Hi Pete and Margo,

I know you are busy preparing for a mobilization, but wondering if you could provide high-level answers to the following tomorrow or Wednesday:

- NFB site.
 - Any radiological isotope sampling of slag (not soil, I know you have a ton of those) in addition to (i) the three samples collected in 2013 and (ii) the five samples collected in August 2017?
 - Any metals/elemental analysis in addition to the five samples collected in August 2017?
- Talarico/Grace site.
 - Any radiological isotope sampling of slag (not soil, I know you have a ton of those) in addition to the two samples collected in 2013?
 - Any metals/elemental analysis in addition to the two samples collected in 2013?

Thank you, and have a great evening.

Tom
